DETAILED ACTION

1. This is in response to the Applicant's amendments and arguments filed on January 01, 2006, in which claims 1, 11, and 15-20 have been amended, and claim 10 has been canceled. Claims 1-9 and 11-20 are currently pending.

Allowable Subject Matter

2. After a further search and thorough examination of the present application and in view of the applicant's arguments and amendments, 1-11 and 11-20, renumbered as 1-19 respectively, are found to be in condition of allowance.

3. The following is an examiner's statement of reasons for allowance: the cited prior arts teach a plurality of communication devices wherein each device includes a memory for storing instruction and a gateway for interconnecting wireline and wireless. The prior arts further teach a pipeline process where the data packet circulates in data-driven processor branching the path of pipelines, and using the path of pipelines as accumulator to decrease processing speed of data flow.

On the other hand, the Applicant teaches, inter alia, wherein each of the micro-engines associated with a respective stage of the pipeline process performs a table look-up function using a respective data packet header to determine if a data packet is capable of being processed by respective micro-engines. This limitation, in conjunction with all limitations of the independent claims, has not been disclosed, taught, or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
